## EDUCATION

### [Openclassrooms.com](#) — *JavaScript React Developer* Diplôme de niveau 6 (bac +4)

2022 - 2023

JavaScript React developers, also known as front-end developers, are in charge of creating dynamic websites using a programming language. They take care of the front-end part, i.e. the visual side of the site. It includes:

- Understanding the project they're working on to develop the most satisfying features and interfaces for their client.
- Implementing mockups with a keen eye for detail and rigorous standards.
- Using best practices to structure HTML, CSS and Javascript code.
- Using frameworks such as React to build powerful and modular applications.
- Using tests to monitor their applications and ensure the highest quality service.
- Providing technical and functional documentation of the site for their clients and colleagues.
- Optimizing page load time.

### [University of Michigan Online](#) — *Web Developer* Diplôme de niveau 4 (bac +2)

2016 - 2017

The capstone will develop a professional-quality web portfolio. Students will demonstrate the ability to design and implement a responsive site for a minimum of three platforms. Adherence to validation and accessibility standards will be required. ([read more](#))
